

ACCESS MODULE CUSTOM AM704

DESCRIPTION

The USC701 can be programmed from a PC to perform many complex functions that are far too complicated to program using the AM702 ACCESS MODULE. However there are applications where a user interface is required to modify parameters within the USC program without changing the base program in the USC. The first application 01 "Wind Speed and Direction" represents an example of the customised applications available, refer to the manual MA70412 for more details

New AM704 can be ordered with a special user defined program for your application, start up costs and price variations will apply.

USC Type No Designation

AM704-XX XX

Application: _____

- *) 01 = Wind speed and direction (MA70412, UAP0011)
- *) 02 =

Compatibility: _____

- *) 01 = Operates with USC modules programmed with USC config versions 101 to 104.
- *) 02 = Operates with USC modules programmed with USC config versions above 104.

*) Price Extra.
